

**Softec HD implant lenses** are the difference between an “off the rack” pair of pants or dress and one that is **custom tailored to fit you.**

**Softec HD implant lenses** are up to **3 times more accurate** than traditional replacement lenses. (They are “micro-prescription” optics available in 1/4 size increments instead of traditional 1/2 sizes.)

**Softec HD's extremely accurate lens** allow Dr. Kaufman to more closely calculate the power of the implant lens to match your prescription and the best vision possible.

**Softec HD cataract Implant lenses** are an exciting, new, technological advancement that brings you **High Definition Vision.**
